

MEET CROSS RIVER FIBER'S NEWEST ADDITION

TECHNOLOGY DEMANDS SPEED.

Your business requires technology that enables fast and secure data transmission of your critical information. Control your company's ability to communicate at the speed of light with high bandwidth solutions through Cross River Fiber's robust fiber optic network.

Cross River Fiber is a premier, New Jersey based boutique telecommunications service provider that designs, constructs, and maintains its own independent and redundant network infrastructure.

Designed around your company's unique requirements, Cross River Fiber provides the most effective and scalable, high-speed fiber optic network solutions for your business. Cross River Fiber specializes in building fiber optic networks within the New Jersey and the New York Metro area and have strategic access to fiber optic networks in many major metropolitan areas around the United States.
